ROLLER SHADE

OUR roller shade systems are loved for their flexibility, durability, and because they are affordable. They look equally as beautiful in a Modern minimalist space as they do under traditional settings. All comes in two system types; motorize and manual. The motorized roller is a very unique system. The ultra-quiet motor is suitable to combine with any smart home system with a touch of a button. While the manual roller shades are divided into two systems, small and medium. Very smooth and easy to operate, a combination of high qualities eco-friendly fabric, creates the perfect product for window covering. We offer from small to **EXTREME LARGE SIZES**.

Anandamaya Apartment, Jakarta

Mercedes Office, Jakarta

ZIPBLIND®

ZIPBLIND® is the new generation of window covering. This system can be created in extreme large sizes and can be installed indoors or outdoors. The special feature of this system is the technological solution of two side guides to hold the fabric, which create tension and will protect you from water splashes and wind for outdoor use. While for indoor, we provide a complete blackout from any unwanted natural light and gives you the most peaceful and relaxing time out. These types utilize opaque fabrics to block light, and they are useful in environments such as bedroom and offices you'd like to keep dark or dimmed. This system is offered in **EXTREME LARGE SIZES**.

OUTDOOR SHADE

DESIGNED for coastal areas, our shades are only made using marine grade stainless steel to protect them from corrosion and rust. Combined with a strong composite fabric which has a very good color fastness and is easy to maintain for outdoor applications. Our outdoor shades are equipped with steel sling roller, and can be made in **EXTREME LARGE SIZES** to protect the room when it rains. Outdoor shades System functions to protect users from strong wind and rain splashes.
